## Education

- B.S. Computer Science, CSU Monterey Bay, May 2018
- Eagle Rock High School, June 2014

## Skills

Experience Areas	Languages/Tech	IT/DevOps
Operating Systems	C++ • C# • C • Rust	Ansible • Docker • Kubernetes
Data Mining	Java / Android • Clojure[Script]	AWS • Azure Linux/*nix Admin/Support
Machine Learning	JavaScript(ECMA)	Windows Setup/Support
Graphics Programming	React.js/Native • Svelte Python • Flask	Unix Tools/Scripts
Multimedia Programming	Unity3D	Git collaboration, build hooks, CI
Software Design	IP Stack	Network admin, filtering, subnets
Game Programming	Elastic Stack • ASP.NET Core • SQL Server	Azure AD, group management,
Computer Networking	R • SciKit Learn • Tensorflow	automation roles
	REST API Design • GraphQL	

## Experience

### Contract Software Engineer | Walmart via Insight Global

March 2021 - September 2021, August 2023 | Remote

- Creating solutions for pushing real-time updates of price information to stores through the Walmart chain
- Maintaining and improving a customized, large-scale stream processing application running on Apache Kafka and Clojure
- Adding visibility to production performance through grafana dashboards & alerts

### Staff Engineer | yU+co

January 2022 - August 2023 | Los Angeles

- Maintenance and development of studio production infrastructure: internal networks, web presence, central storage, render farm, etc
- Implemented policy and practice for studio asset security
- Responsible for on-call technical support, resolving hardware and software issues to meet deadlines
- Engineering consultant for various internal and external projects, guidance for building robust and sustainable systems

### Software Engineer II | Capture2

July 2018 - August 2019 | San Diego, CA

- Created reporting integrations for Office365 using ReactJs, allows customers to create reports using tools they're already familiar with
- Implemented a search-by-location capability for govt business opportunities, allowing customers to easily find opportunities in places relevant to their business
- Eliminated wasted time and human error from manually deploying backbone architecture by automating with Azure RM templates, Ansible, Docker, and Kubernetes
- Deployed and maintained a set of polyglot backend REST API services which added critical features, including technologies implemented in C#, Java, and Python
- Used Kibana to identify performance bottlenecks in Elasticsearch and improve customer experience

## Freelance Software Developer

January 2020 - March 2021, September 2021 | Los Angeles/Remote

- Provide technical services to clients, such as backend software or web development
- Determine scope and outcomes for client projects
- Consulting for software installation and operations, hosting, recurring costs, etc
- Delivered such products as a scheduler for an interactive LED display at the LA Music Center, custom web applications for clients like the Fowler Museum, multiple client portfolio websites, and more

## Co-Founder/Software Developer | Spodder

August 2019 - January 2020 | Remote

- Allows users to anonymously add and discover 'beacons' on a shared map, which detail local places and events
- Created mobile app using React Native/React-Redux with integrated analytics tracking
- Deployed infrastructure using docker-compose and cloud-native services like S3

## Teaching Assistant | TA++ Program, CSUMB SCD

August 2016 - June 2018 | Seaside, CA

- Delivered quality instructional assistance to the Intro, Multimedia, and Web programming classes
- Advised students on technical considerations for python multimedia projects
- Collaborated on an engaging intro programming curriculum including in class labs, study sessions, and extracurricular activities
- Directed Peer-Led-Team-Learning sessions that improved student cooperation and practical problem-solving skills

## Undergrad Researcher | CSUMB-UROC Research Internship

May 2016 - August 2017 | Seaside, CA

- Synthesized original research in computer input peripherals
- Used data science methodologies and python data science frameworks like scikit and Tensorflow to test signal processing and classification techniques
- Assisted in other VR/peripheral related projects in a cooperative lab environment, particularly in system administration/maintenance activities

## Highlighted Projects

### Dbpedia browser

[Click to try the app](#)

### AttentiveAI | Using ubiquitous 5G for classroom engagement

#### Winner of ATT 5G Hackathon – Best use of Cloud Technology

- Application that gives teachers realtime information on classroom attention, using computer vision and IoT devices. Consulted on the concept and provided guidance for using React Native

### ~~Trumpbot~~ | RNN trained on tweets to generate new messages

#### [Github Repository/Jupyter Notebook Report](#)

- Takes tweets from ~~@realDonaldTrump~~ and creates new messages. Uses preprocessing techniques in sklearn and an RNN-based text generator written in Tensorflow

## **Flex | Hand gesture recognition using muscle flexing sensors**

### **[ACM Digital Library](#)**

- Novel gesture sensor intended for use as a general-purpose remote control
- Used multiple recurrent neural networks in a bagging configuration to classify gestures used by the Myo sensor
- Developed driver code for the sensor, recording framework for collecting gesture samples, implemented classification techniques

## **Multi-Leap | Multiple LeapMotion controllers on one machine**

### **[Demo on YouTube](#)**

- System that allows for multiple people to use an interactive projection surface at the same time
- Multiple leapmotion hand trackers on one machine, multiplexed through systemd-nspawn
- Doesn't require any virtual machines, fault-tolerant
- Can be used over the network or locally for interactive applications

## **Misc Experience**

### **US Census Enumerator | US Census Bureau**

July 2020 - August 2020 | Los Angeles, CA

### **Computer Repair Volunteer | Loaves Fishes and Computers**

September 2017 - January 2018 | Salinas, CA

- Technician assisting with refurb of computers for in-need community members
- Wrote software for automated hardware lifetime checks & issue reporting
- Assisted customers one-on-one in technical support and consultation
